Lighting info (What is energy harvest)

Hong Kong-Zuhai-Macau Bridge, which opened on October 24, 2016, is the longest bridge in the world.

It is 55 kilometers long and is 20 times the length of the Golden Gate Bridge in San Francisco, USA.

Using this bridge, the road trip between Hong Kong and Macau is reduced from 3 hours to 30 minutes. About 30 kilometers from China to Hong Kong is an offshore bridge and about 7 kilometers is an undersea tunnel.

According to the BBC, at least 18 workers died during the construction period, also referred to locally as the Bridge of Death.

Product introduce, Lighting for construction work

STELLON

170w cylindrical LED lighting
5m ambient brightness 100lux
30000lm (30000lm)

Modifiy remote control
Portability information report
Scalability up to 10 connections

Lighting for construction work
Type A 170W

170W A (Cylindrical / 170W) (x1)
170W B (Cylindrical / 170W) (x1)

Lighting for construction work

LED 170W cylindrical lighting
suitable for indoor
construction work lighting

Product Features

01. Indoor work lighting

02.Connectable

03.Portability

04.Able to seperate

Specifications

LED	Beam angle	CRI	CCF	Operating temperature
170W	120°	90	90	-20~+50℃
