STELLON

2020
Happy New Year

EGM World news

2019 is now just over a month away. As each world economy grows, life is getting richer. But in developing and underprivileged countries, they are struggling with lack of water and lack of electricity.

In particular, countries that suffer from lack of electrical energy use more LED lighting than conventional lighting. The reason is to consume a little less energy. Many nations want to be abundant materially and mentally.

This was a privilege that only a limited country could enjoy. However, I hope that 2020 will be a year when everyone in the world can feel happy.

Product in issue

MF010
DC12V20W
FLOOD LIGHT

01. METAL HALIDE SUBSTITUTE

-Possible to replacement with metal halide 75W

-10%~25% brightness up

02. PERFECT WATERPROOF

-IP67

-Patented patent

-Moisture proof, micro dust proof, frozen proof

03. SAVING ELECTRICITY COST

-50%~60% electricity cost reduction

-Energy saving

04. HIGH DURABILITY, ULTRA LIGHT

-Possible to control the angle

-electric, uncondition house

■ Specifications

TOTAL FLUX (LUMEN/HOUR)	CR	OC
1,700lm	5000K	6000K/6500K
IP LEVEL	WEIGHT	TEMPERATURE
IP67	0.45 kg	-20~40°C
